OPENING & SAFETY SENSOR
FOR AUTOMATIC SLIDING DOORS

(according to EN 16005 and DIN 18650)

User's Guide for software version 0600 and higher
(refer to tracking label on product)

Download the BEA DECODER app
for a quick overview of settings

DESCRIPTION

- | | | | |
|----|-----------------------------|----|----------------------------------|
| 1. | LCD | 6. | main connector |
| 2. | radar antenna | 7. | main adjustment knob |
| 3. | IR-curtain width adjustment | 8. | IR-curtain angle adjustment knob |
| 4. | IR-lenses | | |
| 5. | cover | | |

ACCESSORIES

BA: Bracket accessory

CA: Ceiling accessory

RA: Rain accessory

CDA: Curved door accessory

9V battery

Smart Daisy Chain hub

HOW TO USE THE LCD?

DISPLAY DURING NORMAL FUNCTIONING

FACTORY VALUE VS. SAVED VALUE

NAVIGATING IN MENUS

CHANGING A VALUE

CHANGING A ZIP CODE

- v = valid ZIP code, values will be changed accordingly
 - x = invalid ZIP code, no values will be changed
 - v/x = valid ZIP code, but from a different product.
- Only available values will be changed.

VALUE CHECK WITH REMOTE CONTROL

1 MOUNTING & WIRING

Fixation is compatible with the ACTIV8.
Mount the sensor securely.

* Depending on OUTPUT CONFIGURATION settings
** For compliance with EN 16005 and DIN 18650,
connection to door controller test output is required.

2 RADAR OPENING IMPULSE FIELD

ANGLE

from 15° to 45°, default 30°

field size: 9
immunity: 2

from -15° to 15°, default 0°

field size: 9
immunity: 2

WIDTH

WIDE : 4 m x 2 m

field size: 9
immunity: 2

NARROW : 2 m x 2.5 m

field size: 9
immunity: 2

The size of the detection field varies according to the mounting height of the sensor.

3 INFRARED SAFETY FIELD

Activate the visible* spots to verify the position of the IR-curtain.

If necessary, adjust the IR-curtain angle (from -7° to 4°, default 0°).

* Visibility depends on external conditions. When spots are not visible, use the Spotfinder to locate the curtains.
 ** The distance between the inner curtain of the inside door sensor and the inner curtain of the outside door sensor should always be smaller than 20 cm. The distance to the door leaf depends therefore on the thickness of the door leaf.

Part of the detection field can be masked to reduce it. The arrow position determines the width of the detection field.

Always verify the actual detection field width with a piece of paper and not the Spotfinder, which detects the whole emitted field.

Additional adjustments are possible by LCD (see p. 5)

Mounting height	Detection width
2.00 m	2.00 m
2.20 m	2.20 m
2.50 m	2.50 m
3.00 m	d max
3.50 m	d max

The size of the detection field varies according to the mounting height and the settings of the sensor. The full door width must be covered.

4 SETTINGS

Choose one of the following presets or adjust the sensor manually (see p.5):

STANDARD: standard in- and outdoor installations

CRITICAL ENVIRONMENT: critical installations due to surroundings or weather

SHOPPING STREET: installations in narrow streets with pedestrian traffic

Presettings: Standard 1

Presettings: Critical env. 2

Presettings: Shopping str. 3

5 SETUP

STEP OUT OF THE INFRARED FIELD!

SETUP 1 (QUICK)
reference picture

2 s

SETUP 2 (ASSISTED)
test of full door cycle +
reference picture

4 s

TEST THE GOOD FUNCTIONING OF THE INSTALLATION BEFORE LEAVING THE PREMISES!

TROUBLESHOOTING

E1		ORANGE LED flashes 1 x.	The sensor signals an internal fault.	<ol style="list-style-type: none"> 1 Replace sensor.
E2		ORANGE LED flashes 2 x.	The power supply is too low or too high.	<ol style="list-style-type: none"> 1 Check power supply (in the diagnostics menu of the LCD). 2 Check wiring.
E3		ORANGE LED flashes 3 x.	The previous sensor in the daisy chain is faulty	<ol style="list-style-type: none"> 1 Replace previous sensor in the chain
			The SDC setting does not match with the real product position	<ol style="list-style-type: none"> 1 Lock the SDC position setting
E4		ORANGE LED flashes 4 x.	The sensor receives not enough IR-energy.	<ol style="list-style-type: none"> 1 Decrease the angle of the IR-curtains. 2 Increase the IR-immunity filter (values ≥ 2.8 m). 3 Deactivate 1 curtain.
			The sensor receives too much IR-energy.	<ol style="list-style-type: none"> 1 Slightly increase the angle of the IR-curtains.
			The sensor is disturbed by external elements.	<ol style="list-style-type: none"> 1 Eliminate the cause of disturbance (lamps, rain cover, door controller housing properly grounded).
E8		ORANGE LED flashes 8 x.	IR power emitter is faulty.	<ol style="list-style-type: none"> 1 Replace sensor.
			 ORANGE LED is on.	The sensor encounters a memory problem.
		RED LED flashes quickly after an assisted setup.	The sensor sees the door during the assisted setup.	<ol style="list-style-type: none"> 1 Move the IR-curtains away from the door. 2 Install the sensor as close to the door as possible. If needed, use a bracket accessory. 3 Launch a new assisted setup.
		RED LED lights up sporadically.	The sensor vibrates.	<ol style="list-style-type: none"> 1 Check if the sensor is fastened firmly. 2 Check position of cable and cover.
			The sensor sees the door.	<ol style="list-style-type: none"> 1 Launch an assisted setup and adjust the IR angle.
			The sensor is disturbed by external conditions.	<ol style="list-style-type: none"> 1 Increase the IR-immunity filter to value 3. 2 Select presetting 2 or 3.
		GREEN LED lights up sporadically.	The sensor is disturbed by rain and/or leaves.	<ol style="list-style-type: none"> 1 Select presetting 2 or 3. 2 Increase radar-immunity filter.
			Ghosting created by door movement.	<ol style="list-style-type: none"> 1 Change radar field angle.
			The sensor vibrates.	<ol style="list-style-type: none"> 1 Check if the sensor and door cover is fastened firmly. 2 Check position of cable and cover.
			The sensor sees the door or other moving objects.	<ol style="list-style-type: none"> 1 Remove the objects if possible. 2 Change radar field size or angle.
		The LED and the LCD-display are off.		<ol style="list-style-type: none"> 1 Check wiring.
			The reaction of the door does not correspond to the LED-signal.	<ol style="list-style-type: none"> 1 Check output configuration setting. 2 Check wiring.
		The LCD or remote control does not react.	The sensor is protected by a password.	<ol style="list-style-type: none"> 1 Enter the right password. If you forgot the code, cut and restore the power supply to access the sensor without entering a password during 1 minute.

LED is off

INSTALLATION

The sensor should be fixed firmly to avoid extreme vibrations.

Do not cover the sensor.

Avoid moving objects and light sources in the detection field.

Avoid highly reflective objects in the infrared field.

MAINTENANCE

It is recommended to clean the optical parts at least once a year or more if required due to environmental conditions.

For complete cleaning, remove both windows by inserting a screwdriver into the notches located between the two windows.

Do not use aggressive products to clean the optical parts.

SAFETY

The door control unit and the door cover profile must be correctly earthed.

Only trained and qualified personnel may install and setup the sensor.

Always test the good functioning of the installation before leaving the premises.

The warranty is invalid if unauthorized repairs are made or attempted by unauthorized personnel.

- The sensor cannot be used for purposes other than its intended use.
- The manufacturer of the door system incorporating the sensor is responsible for compliance of the system to applicable national and international regulations and safety standards.
- The installer must read, understand and follow the instructions given in this manual. Improper installation can result in improper sensor operation.
- The manufacturer of the sensor cannot be held responsible for injury or damage resulting from incorrect use, installation or inappropriate adjustment of the sensor.

TECHNICAL SPECIFICATIONS

Supply voltage*:	12V - 24V AC +/-10% (50 - 60 Hz) ; 12V - 30V DC +/-10%
Power consumption:	< 2.5 W
Mounting height:	2 m to 3.5 m
Temperature range:	-25°C to +55°C; 0-95% relative humidity, non condensing
Degree of protection:	IP54 (IEC/EN 60529)
Noise:	< 70 dB

Detection mode:	Motion Min. detection speed: 5 cm/s	Presence Typical response time: < 200 ms (max. 500 ms)
Technology:	Microwave doppler radar Transmitter frequency: 24.150 GHz Transmitter radiated power: < 20 dBm EIRP Transmitter power density: < 5 mW/cm ²	Active infrared with background analysis Spot: 5 cm x 5 cm (typ) Number of spots: max. 24 per curtain Number of curtains: 2
Output*:	Solid-state-relay (potential and polarity free) Max. contact current: 100 mA Max. contact voltage: 42 V DC/ 30 V AC In inverted frequency mode: pulsed signal in detection (f = 2.5 Hz)	Solid-state-relay (potential and polarity free) Max. contact current: 100 mA Max. contact voltage: 42 V DC/ 30 V AC Holdtime: 0.3 to 1 s
Test input*:		Sensitivity: Low: < 1 V; High: > 10 V (max. 30 V) Response time on test request: typical: < 5 ms
Safety Standards:		EN ISO 13849-1 PL «C» CAT. 2 (under the condition that the door control system monitors the sensor at least once per door cycle) EN 16005 (protective devices) DIN 18650-1 (protective devices) EN 12978

Specifications are subject to changes without prior notice.
All values measured in specific conditions and with a temperature of 25°C

* External electrical sources must be within specified voltages, max 15W and ensure double insulation from primary voltages.
